

Ultherapy

Our practice is among the first in the United States, and the exclusive provider in Seattle, to offer the new non-surgical Ultherapy procedure for the tightening and lifting of loose, lax skin. The Larrabee Center, a site of excellence, is also second in the nation for number of Ultherapy procedures performed.

Cleared by the FDA in September 2009, it utilizes medical ultrasound - renowned for its gentleness and safety - in a completely non-invasive procedure.

We place an ultrasound wand on top of your skin to send ultrasound waves below the surface, causing the underlying tissue to contract and new collagen to form over time.

There is no downtime with Ultherapy, and you can return to normal activities immediately.

We are seeing very impressive results with Ultherapy. Call our office to schedule your appointment, 206-386-3550.
