

As the sunny days of summer wind down, it's time to think about undoing the ravages of sun exposure. Refresh and rejuvenate your skin with a Fotofacial (IPL) and/or a Vi-Peel. These are treatments that "turn back the hands of time," giving you a smoother and clearer complexion.

Fotofacial (IPL) is one of the top non-surgical procedures for enhancing skin's texture, color, and overall appearance. There is no down time involved and requires as little as one to five treatments to make a noticeable difference in your skin.

The Vi-Peel is great to give skin a fresh, smooth, clean appearance. It exfoliates the skin, allowing your skincare products to penetrate to a greater depth.

To schedule a treatment or a complimentary skincare consultation with Lauren Gross, please call our office at 206-386-3550.
