

**Lauren Jackson-Gross, L.E.**  
**Director of Skincare**  
**Licensed Aesthetician**  
**Certified Laser Technician & Trainer**

Lauren has been with the Larrabee Center for eight years and brings over eleven years of aesthetics experience to our team. Lauren graduated from the Euro Institute of Skin Care and has advanced training from the Laser Training Institute and the Dermal Institute in California. Her advanced training and experience include extensive laser treatments, product training, and treatments for sun-damaged, maturing and acneic skin. As an aesthetician, Lauren focuses on scientifically proven treatments and products. She stays on the cutting edge of skin care through continuing education.

In addition to her significant knowledge and experience, Lauren possesses a passion for proper skin care and the dramatic changes it provides. She personally experiences each and every skincare treatment offered at the Larrabee Center, as well as each product that the Larrabee Aesthetic Center carries. Her hands-on approach gives her the ability to describe the effects of each treatment and products she recommends.

As with Dr. Larrabee and the other members of our aesthetics team, Lauren is an educator. She not only shares her knowledge and expertise educating other aestheticians, she has a passion for educating her patients in regards to overall good skin health. As an aesthetician, Lauren sees skin as a canvas – she looks past the pigment, acne, and other imperfections and visualizes what is really possible – clear, luminous skin. She analyzes skin texture, epidermal thickness, vascular condition, and overall skin health. Lauren believes that surgery takes care of many of the concerns with the aging face, but only proper skin care can correct the texture and condition of the skin.

Lauren's repertoire of treatments includes Ultherapy, Fraxel, IPL (fotofacial), chemical peels, microdermabrasion, and laser hair reduction. She always looks forward to meeting with patients and discussing their individual skincare needs.
