

NiCole Edwards
Licensed Aesthetician

NiCole Edwards joined the Larrabee Center in 2010 and brings with her an eighteen year history of medical experience. Prior to joining our team, she was a licensed Dialysis Technician with the Northwest Kidney Center. During these foundational years in direct patient care NiCole developed a keen understanding of the relationship between the skin and underlying constitutional changes of the organ systems. Throughout this time she also developed a thoughtful understanding of the human condition as we age.

In time NiCole decided to further pursue her passions in skin restoration and graduated from the prestigious Euro Institute of Skincare. The complementary nature of NiCole's education, medical experience and current passion helps to fulfill one of her greatest joys: helping her clients achieve optimal skin results through focused and specialized therapies.

NiCole specializes in skincare analysis, customized facials, chemical peels, micropeels, microdermabrasions, Intense Pulsed Light (IPL), photofacial, and laser hair reduction. NiCole also works very closely with Dr. Ridgway on the skincare needs of laser, advanced chemical and postsurgical patients as they undergo rejuvenating and reconstructive operative procedures.
